HERE Destination Weather

Enable drivers to stay ahead of changing weather conditions

HERE Destination Weather is a connected service that can be embedded into navigation systems and deliver weather forecasts to drivers. It provides them with the information they need to avoid inclement weather and stay safe on the road.

HERE Destination Weather sources high-quality data from 280,000 weather observation stations around the globe. The service's proprietary model delivers comprehensive forecasts that combine topography, vegetation, cloud coverage and precipitation. Drivers can be provided with specific forecasts for any location by submitting the desired city name, geographic coordinates, zip code or through free text with the service's flexible search options.

Key use cases for Automotive OEMs, Public Sector operators and more

- → **Display weather conditions on a map**
- → **Provide weather alerts along driving route**

Global Coverage & 2-Level Offering

Powered by data from more than 280,000 weather observation stations, the service offers global coverage. This eliminates the need to manage inconsistent data, while connecting endusers to a single source of information. With more features, such as Weather Alerts along Routes, Precipitation Map & Doppler Radar the Premium Offering bring addional benefits: you can chose the solution you need.

Ensure and deliver safer driving & route planning

With 39 alert types, 36 air description values, 45 precipitation descriptors, and 36 temperature descriptors, the service offers very granular weather information, leaving no chance to drive unprepared.

Take advantage of HERE's Fullrange service offerings

Maximize the value for the drivers and minimize multiple supplier contracts by sourcing this service in combination with other HERE connected services, such as Parking, Traffic, and Fuel Prices.
