# HERE GIS Data Suite

High-integrity GIS data, ready for analysis in Esri environments

Spend less time preparing data and more time advancing insights with HERE's ready-to-use GIS content.

Designed for GIS professionals using ArcGIS Pro, HERE GIS Data Suite delivers current, richly attributed and reliable data that is instantly usable in your GIS workflows.

With HERE's proven mapping expertise behind it, HERE GIS Data Suite empowers faster, more informed decision-making—supporting the business-critical and strategic work of your organization.

Ready to use

Save time and reduce data prep with Esri-ready GIS datasets that include vector tile packages, detailed network datasets, precision locator files and historical traffic, all pre-configured and ready to go.

High integrity

Make fast, informed decisions with data that's globally consistent and refreshed quarterly. HERE's rigorous data standards and 40 years of experience ensure the reliability and accuracy your projects demand.

Granular insights

Expand your GIS impact with over 75 richly attributed datasets that support a broad range of use cases—from transportation planning to asset management—featuring detailed location attributes and industry-leading truck data.

Benefits

→ **Reliable content:** Built on 40 years of expertise and rigorous data quality
→ **Time savings:** Eliminate prep work with pre-configured ArcGIS files and pre-styled vector tiles
→ **Greater insight:** 75 datasets with traffic, truck, and location attributes
→ **Always up to date:** Refreshed quarterly to keep you working with the latest information

Features

→ Quarterly updated global data for accurate, up-to-date analysis
→ Flexible delivery options: choose a smaller, project-specific cut or a regional package
→ A network dataset with historical traffic for ArcGIS Network Analyst
→ High-precision locator file for geocoding and point address data
→ Extensive places and POI data with highly detailed attribution
→ Road network attributes including tolls, height limits and weight restrictions
→ Vector tile packages for fast-loading, professional-quality basemaps
→ Ready-to-use maps and layers for immediate visualization and analysis
→ Trusted by enterprises and governments worldwide

Delivery
Datasets in Esri-native formats

Coverage
Global coverage, excluding China, North Korea, Japan, Russia, and other restricted or non-navigable markets.[1]

[1] For the full list of excluded countries, see:
